Silent Air Technology™ sound diffusing system

Soft ride wheels, protects hard floors

Washable HEPA 13 exhaust filter

SLG Independent tests to IEC 704 global standard 2009

**QUIET**

Compatible with everyday living...

### Our quietest vacuum cleaner ever!

Silent Air Technology™ gives UltraSilencer a record low noise level of 68 dB(A). From the nozzle to exhaust, the inside of the vacuum cleaner has been aerodynamically shaped, with a floating motor, rubber seals and absorbent foam to dampen noise, all the while delivering high airflow and powerful suction.

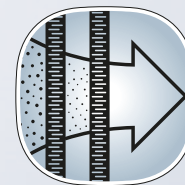

### 68 dB(A) – quieter than you think, hearing is believing.

At 68 dB(A) the sound level is significantly quieter than many vacuum cleaners of 78 dB(A), and we've "designed" the sound to be smoother and less aggressive. Simply plug it in, try it and compare!

### Excellent cleaning performance!

Our quietest vacuum cleaner ever, but doesn't compromise on cleaning performance. Powerful airflow along with the innovative AeroPro™ nozzle system ensure an excellent result, every time.

### Clean air HEPA filtration!

UltraSilencer is completely sealed, making sure that dust and dirt stay where they're supposed to – in the vacuum cleaner. Also featuring an extremely efficient HEPA 13 filter, the air exiting the UltraSilencer is cleaner than the air sucked into it.

# ultrasilencer™

Our quietest vacuum cleaner ever

The UltraSilencer is so quiet you can now do things that you might not have associated with vacuuming, like talking on the phone, vacuuming around sleeping kids, or enjoying music without earphones.

Phone-compatible

Vivaldi-compatible

Sleeping kids-compatible

Conversation-compatible

Hangover-compatible
