BENEFITS

A FRESH, ODOUR-FREE FRIDGE
FresherAir carbon filter helps preserves the natural aromas of your stored food and keeps the refrigerator smelling fresh. This filter effectively absorbs unpleasant odours and reduces any transfer between ingredients.

FOOD PROTECTED ON EVERY SHELF
Cooling 360° helps protect the food quality by optimising stable temperature and humidity levels throughout the entire fridge. Multiple air channels on the rear wall actively circulate cold air to every corner.

HELPS PRESERVE FRESHNESS
GreenZone drawer helps keep produce fresh for longer. The automatic humidity control maintains the optimal conditions for storing fruit and vegetables while retaining initial Vitamin C levels after 7 days*. *Tests performed by SGS Thailand Laboratory on vitamin C retention in oranges after 7 days storage in Greenzone compartment. Results depend on the freshness level of the material on the first day of storage.

Save up to 10% energy*
AI CoolAssist automatically adapts your fridge settings to your daily rhythm, keeping food fresh while saving up to 10% energy*. Auto Shopping Mode detects new groceries, and Auto Vacation Mode recognises when you're away. *Test performed on the BF70/80 models comparing the 24 hour consumption when the AICoolAssist function is activated with the default factory mode. Actual energy saving may vary, depending on environmental temperatures. Increase in temperature may affect the preservation of food.

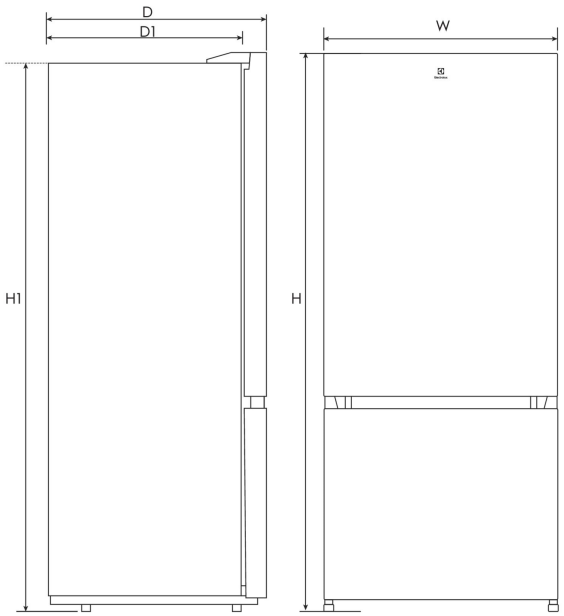
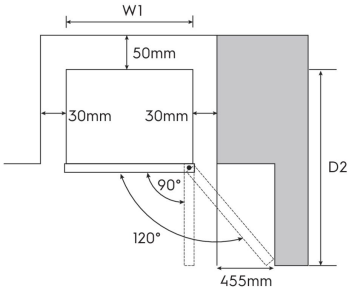
Dimension Guide

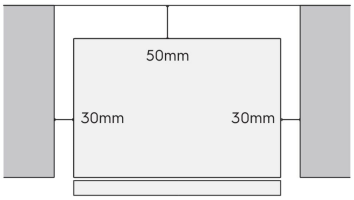
Bottom freezer refrigerator

Model:
EBE5002BE

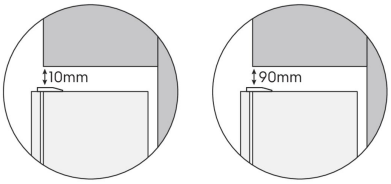




When positioned in a corner area, spacing a minimum of 455mm on the hinge side will allow the doors to open enough to enable the removal of bins and shelves.



Allow a minimum of 30mm clearance on both sides of the refrigerator and 50mm clearance at the back.



Allow a minimum of 10mm clearance above the hinge cover. If you do not have a cupboard with allowance for air flow above the refrigerator, the recommended clearance area on top increases to 90mm.
